

December 26, 2020

Dear Residents and Families,

I hope you all were able to enjoy Christmas. I know we all celebrated in different ways this year, but the true joy of Christmas can be with us in any situation.

We have new campus COVID-19 activity to report to you and an update on vaccination. At a time when the virus is having the greatest impact on our county, we are relieved to know that help is on the way in the form of a vaccine. We hope to put COVID behind us and look forward to recovering as a community.

Our CVS-Omnicare Vaccination clinics are confirmed for January 3 and January 24. We are working through the process of providing education and obtaining consents prior to these clinic dates. Our partner pharmacy will administer the vaccine at our campus. Residents and coworkers of nursing homes and personal care facilities will be the first to receive the vaccine. We believe independent living residents will be in the next tier to receive the vaccine.

I share with you below a brief update of the recent COVID activity for each level of care on our campus.

Health Care Center

On December 25, 2020 we received notification that a resident on our Countryside Unit tested positive for the virus. This was a result of our weekly surveillance testing of residents. This resident is not displaying any symptoms at this time and has been moved to our COVID recovery unit for monitoring and care.

Our mitigation strategy includes immediate testing of all staff and residents, twice weekly testing over the next 14 days. We will continue our strict isolation precautions for the entire unit until we have 14 days with no new positive results.

At this time there **are no other active** staff or residents cases from our Health Care Center.

A Continuing Care Retirement Community

Assisted Lifestyles / Personal Care

On December 25, 2020 we were also notified of 1 new positive result of an Assisted Lifestyles apartment resident. This resident is experiencing no symptoms at this time and has been moved to our COVID recovery unit for monitoring and care. With this additional case, we have had a total of 5 Assisted Lifestyles residents test positive, 2 have recovered and the remaining 3 will recover in the next week.

Out of an abundance of caution, we are conducting twice weekly testing on all staff and residents.

Assisted Lifestyles residents will isolate in their apartments for 14 days. During this time we will provide in room dining and activities.

Our Waterside Personal Care Unit currently has no resident or coworker.

Independent Living

I am pleased to report that we have no resident or coworker cases in our independent living community at this time.

I wish you all a Happy New Year!

Lisa Defibaugh, Executive Director
